

quickprint

I told you I never make mistakes

MATERIAL TO PUBLICATIONS DELIVERED TO SPEC EVERY TIME

From the moment you start building a print job to the final despatch, quickprint takes all guess work out of the job every step of the way, so it always arrives at the printer or publisher 100% correct.

Whether you're designing material using Adobe InDesign or QuarkXPress, quickprint's global database of up-to-the-minute printer and publisher specifications lets you access their requirements, including colour profiles, so there are no specification errors or omissions.

Every print job is automatically checked and validated to identify any problems. Quickprint then creates an optimised PDF ready for publication.

Quickprint - it really will make your life easier.

Snapshot

Key Benefits:

- Conduct more than 280 validation checks on any PDF file created in any application against the exact specifications in our global database.
- Just drag and drop the file on the quickprint icon for ease of use and file integrity
- Has Adobe® Distiller® built in, so it creates a print ready PDF, without having to open a separate PDF creation program for cost and time savings.
- Lists all faults and warnings plus highlights them visually on the same screen, for easy reference.

Key Features:

- Cross platform capability for MacOSX or PC (Windows 2000 or XP)
- Built-in colour management and Adobe Distiller® delivers exact colour management and job specifications
- Single or multi-page capability you can process everything from a single advertisement to a whole book
- Export direct to PDF from InDesign or QuarkXPress
